

NEW
Android SW PATLink

A 1433 PATLink Android

From Scan to
Test in Seconds

The PATLink Android is a powerful tool. It enables fast and simple data management of tested appliances, as well as a quick overview of already performed tests by simply scanning a QR code. The Application enables the user to enter and save data to the test instrument by using a Smart phones' keyboard. Also it enables a creation of the custom made database for portable appliances' ID's, the appliances' names and the appliances' locations. All these features enable the user a faster and easier data handling.

PATLink Android enables the user to scan the QR codes which contain information of the previous results, the test status, and the previously used test sequence. Based on this information the user can start the retest of the appliance with a single press on the Android Application.

KEY FEATURES:

- On - site comparrrison of the test results;
